

# CPRG 250

## Lab Module 1

### Installing Oracle and Loading the JustLee, ICCC, and WGB Databases

#### Exercise Objectives

Here is what you will be able to do when you complete each objective:

- Install and configure the Oracle 18C Express Edition
- Install the JustLee, WGB and ICCC Databases
- Verify the installation

#### Exercise Tasks

##### 1. Install Oracle 18c

##### Download

Go to Oracle Corporation<sup>®</sup>'s website and download the software file for Oracle 18c Express Edition (you can choose to download the software for Linux or Windows).

<https://www.oracle.com/technetwork/database/database-technologies/express-edition/downloads/index.html>

If you do not yet have an account on the Oracle website, this is when you can create one.

##### Pre-Installation

In order to install this software, your Windows user must be part of the *Administrator* group.

##### Installation Instructions

###### Step 1:

Unzip the downloaded file (unzip to a separate folder).

###### Step 2:

Double-click on the *setup.exe* file as shown in Figure 1.

 Oracle Database 18c Express Edition.msi	2019-02-08 7:06 PM	Windows Installer ...	12,617 KB
 setup.exe	2019-02-08 7:05 PM	Application	1,533 KB
 Setup.ini	2019-02-08 6:35 PM	Configuration setti...	6 KB

**Figure 1**

**Step 3:**

Click *Next* on the introduction screen as shown in Figure 2.

**Figure 2: Oracle 18c Express Edition** (Copyright © 1995, 2018, Oracle and/or its affiliates. All rights reserved.)  
Used with permission from Oracle Corporation based on copyright statement located at <https://www.oracle.com/ca-en/legal/copyright.html>

**Step 4:**

**Completely read the terms of the license agreement.**

When done, select *I accept the terms in the license agreement* and then click *Next* on the License Agreement screen as shown in Figure 3.

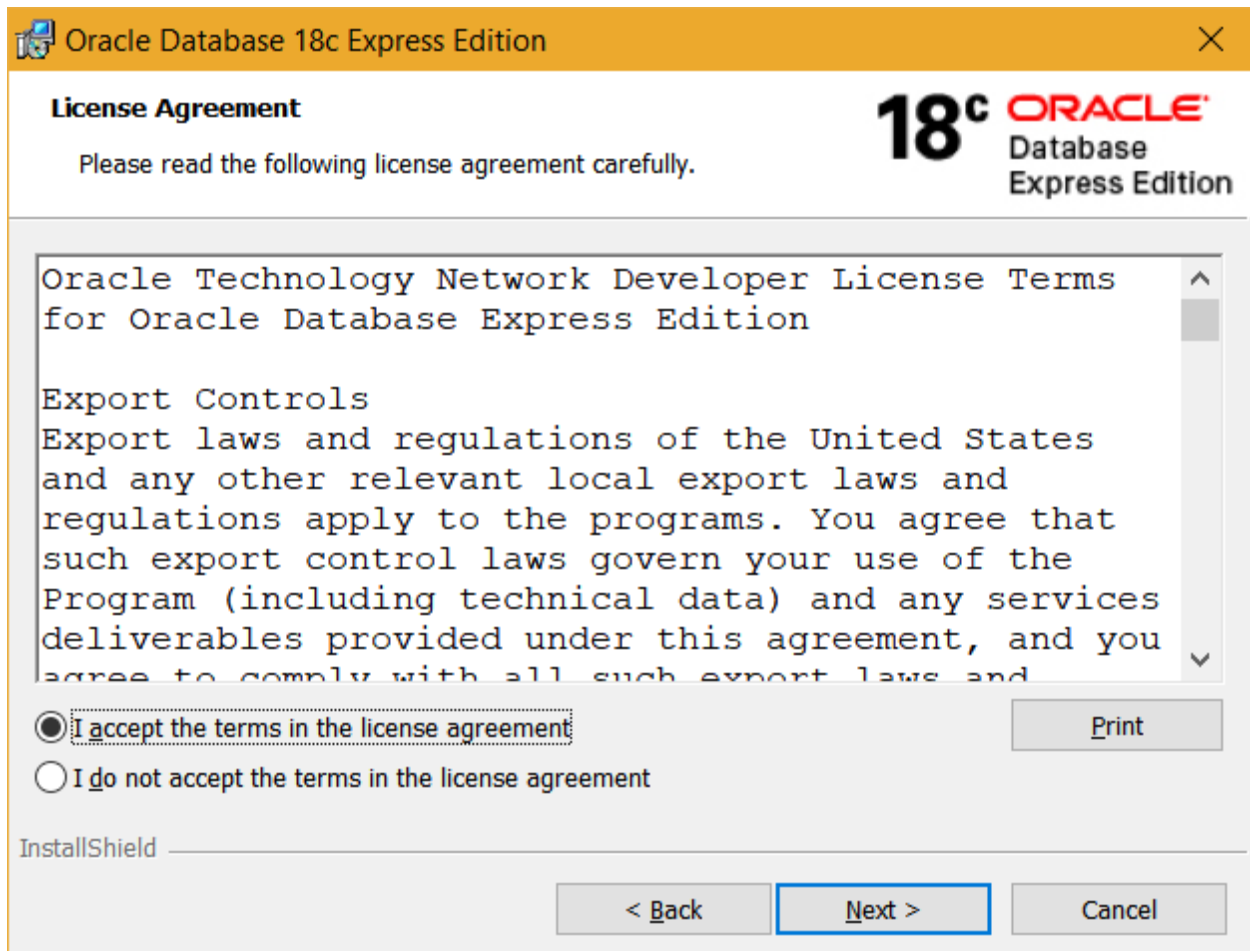

Figure 3: Oracle 18c Express Edition (Copyright © 1995, 2018, Oracle and/or its affiliates. All rights reserved.)  
Used with permission from Oracle Corporation based on copyright statement located at <https://www.oracle.com/ca-en/legal/copyright.html>

**Step 5:**

**Identify the location you wish to install the software (or go with the identified default)**

**Click *Next* on the Destination Folder screen as shown in Figure 4.**

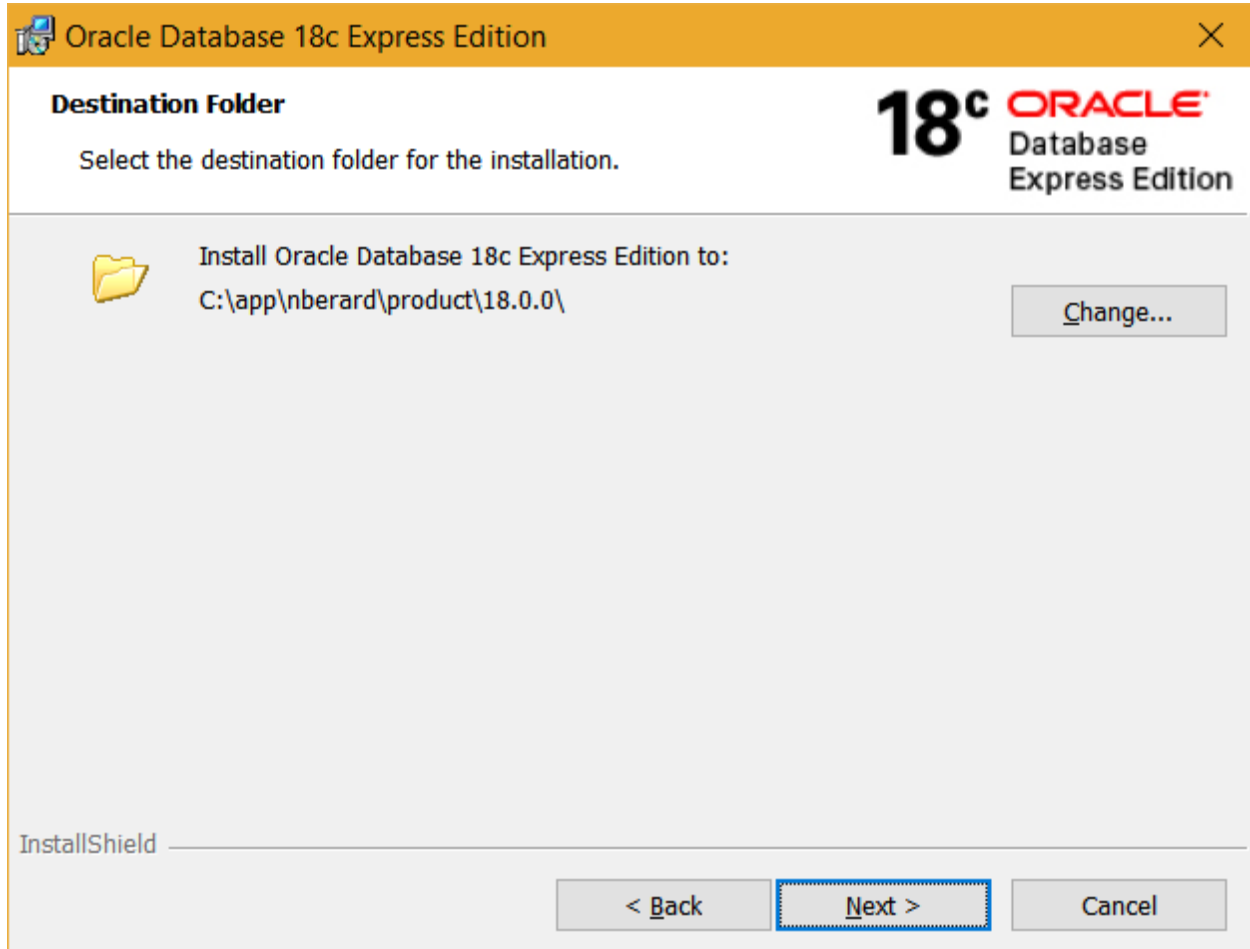

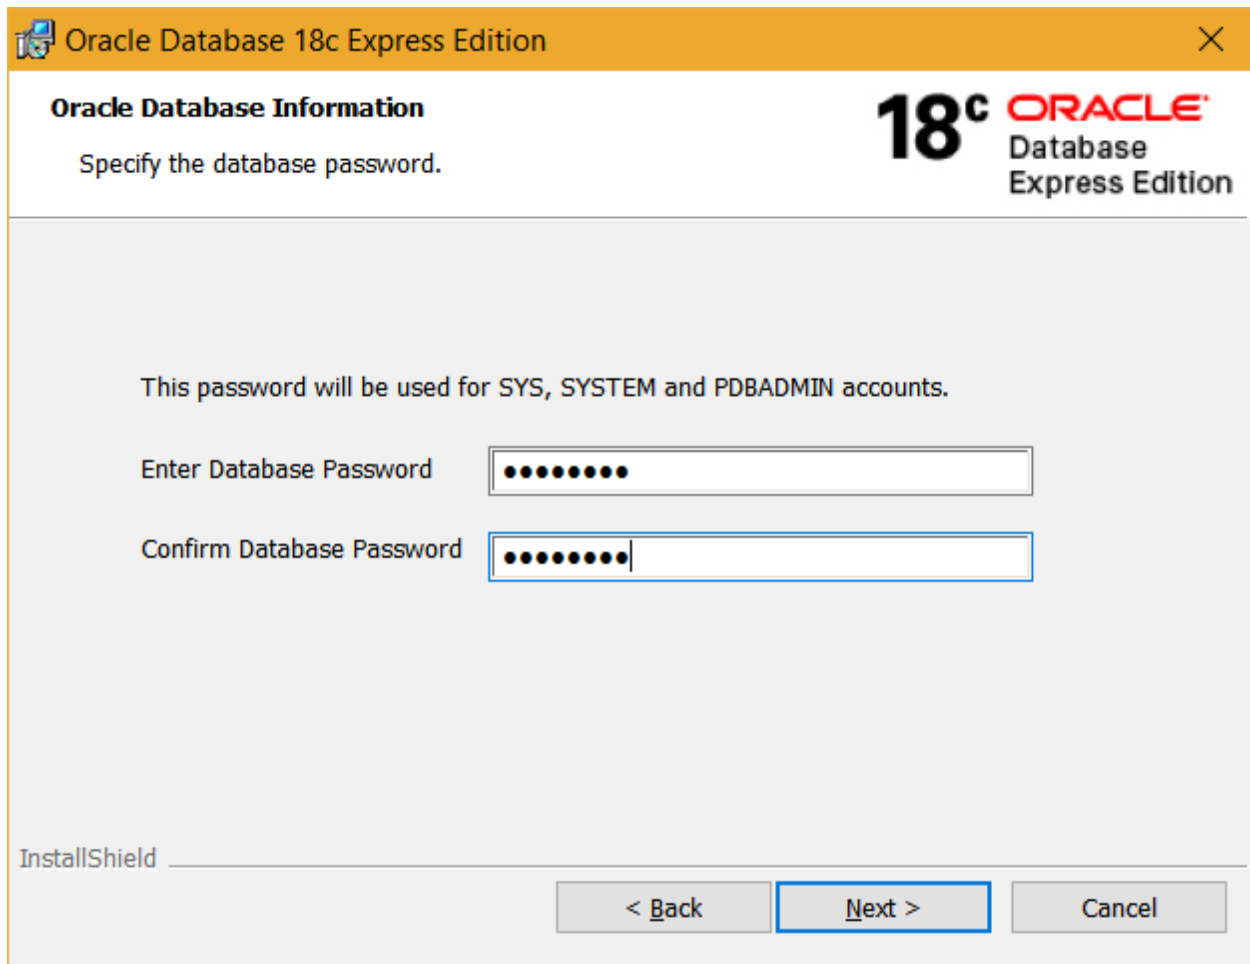

Figure 4: Oracle 18c Express Edition (Copyright © 1995, 2018, Oracle and/or its affiliates. All rights reserved.)  
Used with permission from Oracle Corporation based on copyright statement located at <https://www.oracle.com/ca-en/legal/copyright.html>

**Step 6:**

Enter the password for the administrative user accounts created during installation.  
Remember the password you choose.

Click *Next* on the Oracle Database Information screen as shown in Figure 5.

The image shows a Windows-style window titled "Oracle Database 18c Express Edition" with a close button in the top right corner. The window's content area has a header section with the title "Oracle Database Information" and the instruction "Specify the database password." on the left, and the "18c ORACLE Database Express Edition" logo on the right. Below the header, a message states: "This password will be used for SYS, SYSTEM and PDBADMIN accounts." There are two password input fields: "Enter Database Password" and "Confirm Database Password". Both fields contain eight black dots, indicating masked text. The "Confirm Database Password" field has a blue border. At the bottom left, the "InstallShield" logo is visible. At the bottom right, there are three buttons: "< Back", "Next >" (which is highlighted with a blue border), and "Cancel".

**Step 7:**

Review your settings and then click *Install* on the Summary screen as shown in Figure 6.

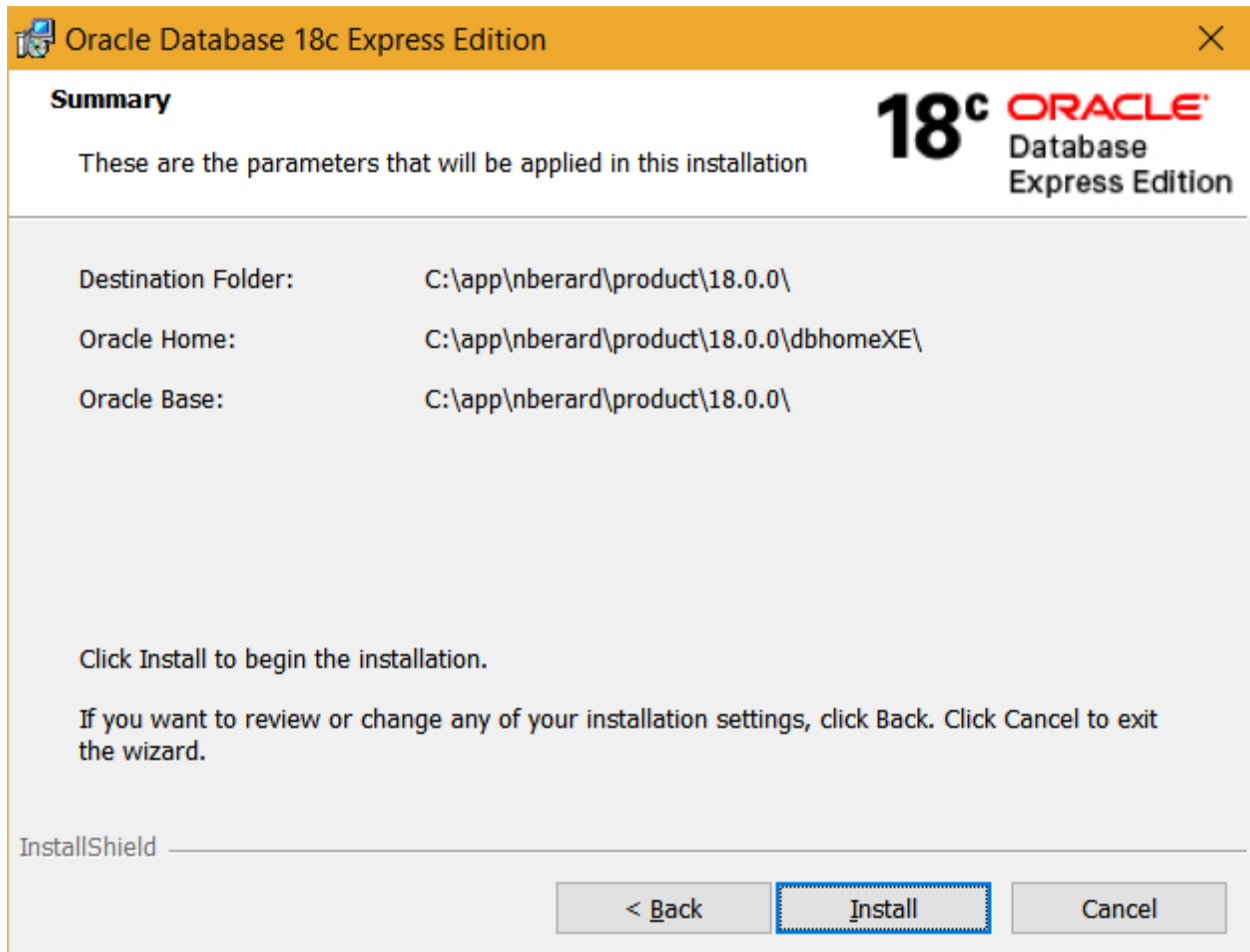

Figure 6: Oracle 18c Express Edition (Copyright © 1995, 2018, Oracle and/or its affiliates. All rights reserved.)  
Used with permission from Oracle Corporation based on copyright statement located at <https://www.oracle.com/ca-en/legal/copyright.html>

**Step 8:**

Installation will take approximately 10 – 15 minutes and the status of this installation will be shown similarly to Figure 7.

## 2. OPEN SQL\*Plus.

Located in the Oracle Database 18c Express folder off of the start menu.  
Write in the search bar CMD, then write SQLPLUS.

Download the files new\_user.sql and build\_JLDB.sql into a new directory called:  
c:\cprg250\Module1

- ☐ 3. **CONNECT** to the system account. Even though you see a SQL prompt, you are not connected to the database yet.

Command: connect sys

Use the password you defined when installing the software.

**EXECUTE** the new\_user.sql script to create a new user.

SQL> start c:\cprg250\Module1\new\_user.sql

This will create the CPRG250 user account which you will use throughout the remainder of the course.

- ☐ 4. Connect to the CPRG250 account.

SQL> connect cprg250

SQL> Password: password

## Using SQL\*Plus and installing Database

### 5. Load the Just Lee Database (used in class and for the Labs)

Login into learn.sait.ca

- o Go to the JustLee Database scripts  
Content->Course Resources->Database->Just Lee
- o Save the file build\_JLDB.sql into to the shared folder (c:\CPRG250)
- o Run the script

### 6. Load the Ivy Covered Community College (used for the

lab midterm) Execute the following tasks:

- o Login into learn.sait.ca
- o Go to the ICCC Database scripts  
Content->Course Resources->Database->Ivy Covered Community College
- o Unzip the files in Windows and copy over the file to the shared folder (c:\CPRG250)
- o Run the scripts in the order defined by the README file

### 7. Load the Walnut Grove Bank Database (used for the

assignments) Execute the following tasks:

- o Login into learn.sait.ca
- o Go to the WGB Database scripts  
Content->Course Resources->Database->WGB
- o Unzip the files in Windows and copy over the file to the shared folder (c:\CPRG250)
- o Run the scripts in the order defined by the README file

**8. Download and run the test script provided within Lab Model 1 on D2L (mod1lab.sql) to verify that all the database have been properly loaded. You should see results for ALL three databases.**

**9. Find your spool file (mod1labspool.txt) and submit it via D2L as proof that your database has been correctly loaded.**
