

## CPRG 250

### Lab Module 4 Part 1

Create the SQL script for the following questions using the JustLee Books database.  
**Create a spool file that includes all of your SQL commands along with the results.**  
Submit the script AND spool file via Brightspace.

1. Add the following lines to your script:  
set echo on  
set linesize 132  
set pagesize 66
2. DISPLAY the titles of all the books in the JustLee Books database. The header for the title column should be "Book Title".
3. DISPLAY the following customer information for all customers formatted as follows:  
*Customer Information*  
*last name, first name, address, city, state, zip*  
*last name, first name, address, city, state, zip*  
...  
  
The column header should be labelled "Customer Information"
4. DISPLAY the title, cost price, retail price along with the % profit for each book. This calculated value should have a column title of **% Profit** (case should be exactly as shown). Profitability should be the difference between retail and cost over the cost price. Show as a percentage. Here is an example:  
cost = 20  
retail = 25  
profit = (25-20)/20\*100 = 25%
5. LIST all author ID that have written books. Only include author IDs that HAVE written a book. Each author ID should be displayed only once. Column header should be "Author ID"
